

**First: Thank you very much for reading this and making us sound good !!**

We bring a rack with our in-ear system and mic splitters. We bring a rack with Kemper amps. We bring our own mics&stands. We do the in-ear mix ourselves. We hand you all the signals from our 5m long split snake from the rack. We have an input for your talkback signal so we can hear you.

We're happy to share a drum set when available. If you need to mic the drums for other bands we add our kick and underheads for our in-ears.

For easier changeover on shared stages we bring two external mic splitter boxes so we can split the vocal line directly at the microphone.

We're easy to work with. If you have questions, please call us anytime.

## **Sound**

- You can go crazy with delays and reverbs if you want
- The two guitars can be panned left and right if you like
- We like compressed Vocals

## **Lights**

- We love heavy light shows
- You can go crazy with fog, strobes, lasers, pyros, ...
- You can even shut down the front light for a better light show. Nobody wants to see our faces anyway. ;-)

## **Channels**

- 01 Kick
- 02 Snare
- 03 Tom 1
- 04 Tom 2
- 05 Tom 3
- 06 Tom 4
- 07 Overhead L
- 08 Overhead R
